Based upon the attached product documentation, the Aruba 515 AP does not come with a mount kit.

See Page 5: Mounting Details.

"A mounting bracket has been pre-installed on the back of the AP. This bracket is used to secure the AP to any of the (sold separately) mount kits; see the ordering Information section below for details"

From the Ordering Information section on Page 9:

Was this an oversite or is a mount bracket not needed?
