

Questions & Answers

RFP - 181001

The following questions have been submitted concerning RFP 181001 – SCHOOL HEALTH SERVICES. All questions received have been answered. The questions below are provided verbatim from what was received from the lone inquiring firm. PLEASE NOTE AN ADDENDUM TO OUR RFP HAS BEEN PUBLISHED.

On page 39, the *Program Costs* table, you request " 1 -HT, for the Pre-k program, 202 days at 1 (one) hour per day", is this a error and it should be for 7 hours per day?

Yes it is an error. It should read 7 hours a day. This will be corrected via an Addendum to our RFP.

On the Program Costs page (39/43), there are a varied number of days for each level of school staff, but your calendar reflects 178 school days/year. What are the days over 178 for - are these designated training days for vendor to utilize or do I need to calculate additional training days?

For Health Technicians/LPNs this includes a day to set up clinics before school starts, a day to close clinics at the end of the year and five (5) days of training. Float staff do not need to set up or close a clinic and only have five (5) days for training. RNs have additional days for training and administrative time. One (1) ESE Health Technician, one (1) Pre-K Health Technician and one (1) RN have additional hours to cover the extended school year in the summer.
