

SC.912.L.16.17 – Mitosis and Meiosis – Example 10 Answer

Which of the following best describes meiosis?

- A. It is carried out in all tissues that require cell replacement.**
- B. It occurs only in cells in the reproductive structures of organisms.**
- C. It happens in all tissues except the brain and spinal cord.**
- D. It is the first stage of mitosis.**

Answer

B. It occurs only in cells in the reproductive structures of organisms.

Meiosis only occurs in the reproductive cells, producing gametes with half of the genetic information as the parent cell.
