

SC.912.L.14.3 – Cell Structure – Example 3 Answer

Which type(s) of cells have genetic material that is contained in a nucleus?

- A. bacteria**
- B. only animal cells**
- C. protists**
- D. both plant and animal cells**

Answer

D. both plant and animal cells

Both plant and animal cells are eukaryotic. Eukaryotic cells have DNA (genetic material) contained in a membrane-bound nucleus.
