

SC.912.L.17.9 – Food Webs and Energy Transfer – Example 2 Answer

A diagram of a food web is shown below.

Which organism receives the least amount of energy from the producers?

- A. Hawk
- B. Rabbit
- C. Grasshopper
- D. Mouse

Answer

- A. Hawk

Available energy decreases as you go up a food chain or web. Secondary and tertiary consumers receive less energy than primary consumers.
