

SC.912.L.17.5 – Population – Example 6 Answer

Which of the following is a limiting factor in a population of organisms.

- A. reproductive replacement**
- B. life spans of the members**
- C. fluctuations in atmospheric temperature**
- D. availability of food**

Answer

D. availability of food

The availability of food is a limiting factor in a population of organisms. If there is not enough food, some of the organisms will die and the population will decrease in number.
