

SC.912.L.16.10 – Biotechnology – Example 5 Answer

The way that crimes are solved today was affected by which of the following technologies?

- A. gene therapy**
- B. DNA fingerprinting**
- C. genetic testing**
- D. Genetic modification**

Answer

B. DNA fingerprinting

Even a tiny section of a person's DNA, left behind at a crime scene can be multiplied many times to make identification possible.
