RFP TITLE:

Generator Replacement, Preventative Maintenance, & Repair

RFP NUMBER:

192303

RFP OPENING DATE & TIME:

NO CHANGE – Tuesday, April 16, 2019 2:00 PM, CENTRAL TIME

NOTE: PROPOSALS RECEIVED AFTER THE RFP OPENING DATE AND TIME WILL NOT BE ACCEPTED.

This Amendment shall serve to amend, replace, and append information provided to the potential Respondents in the original RFP package. To assist in the development of their responses, interested firms are encouraged to carefully review the information found in this Amendment.

The following information contained in the original RFP has been added, deleted, or replaced:

- #1. Section IV.B. (page 10) is deleted in its entirety and replaced with the following Section IV.B.:**
- B. Generators provided under this agreement must be new (i.e. not used or refurbished), and must meet or exceed the performance and safety specifications of the generators currently in use at each location. Any generator below 20 KW (i.e. the generator at Beulah Middle School) will be replaced with a 20 KW unit or above. See Attachment A for model numbers and wattage of initial generators to be replaced.
- #2. Section IV.C. (page 10) is deleted in its entirety and replaced with the following Section IV.C.:**
- C. The awarded Responder shall replace all transfer switches connected to each generator with the exception of the automatic transfer switch at the McDaniel Building and the automatic transfer switch at the Central Warehouse. No generator provided under this agreement shall be fitted with an Automatic Switch Company (ASCO) transfer switch.
- #3. Section IV.G. (page 10) is deleted in its entirety and replaced with the following Section IV.G.:**
- G. Installation and hookup services shall be “white glove,” as defined above, and shall include but not be limited to, removal of old generators and associated fuel tanks, installing and connecting natural gas lines and cutoff valves (one (1) cutoff valve at the point of service and one (1) cutoff valve on the generator apparatus), installing and connecting required electrical wiring, performing initial startup, and executing an eight (8) hour load bank test. This initial load bank

test shall be performed immediately to ensure that the new generator is fully operational and working properly. A second, four (4) hour load bank test shall be performed within the final ninety (90) days of the third year of the warranty period. The fuel tank at the McDaniel Building shall be left in place as-is after the fuel is drained, and the new generator shall be installed on top of the existing tank. The terms "white glove" and "turnkey" are interchangeable within this agreement.

#4. The following Section IV.R. is added after Section IV.Q. (page 12):

- R. Responders may make an appointment with the Maintenance Department to review the blueprints of each location. Appointments may be made by calling 850-469-5586.

By signing below, the Responder acknowledges receipt of the Amendment for RFP #192303. Respondent must attach and return all pages of this Amendment with their Proposal.
